

It's a new road! – With the Verigo Wireless Log Book, Vehicle Inspection Report and On-line Auditing

The Verigo software program streamlines the collection and processing of drivers' daily log sheets and vehicle inspection reports. It is quickly becoming an industry standard for compliance and more importantly the logbook preferred by drivers. The Verigo software program runs on the UTStarcom 6700 Pocket PC cell phone available from most cell phone retailers.¹

Our wireless logbook and inspection report will:

- allow log sheets and inspection reports to be e-mail to the office on a regular basis
- reduce the time drivers spend completing log books
- streamline vehicle defect reporting
- reduce workload and increase speed of process log sheets and inspection reports
- reduce the time and cost of compliance audits
- eliminate rule misinterpretation errors
- automatically calculate available driving hours
- reduce hours of service training time
- time stamp logbook entries
- improve highway safety
- permit faster roadside inspections
- increase driver earnings
- increase trucking company revenues

The Verigo logbook program automates five of the six manual log sheet tasks.

- Drivers are only required to make simple touch screen entries to complete their log sheet.
- The Verigo logbook and inspection program is 100% compatible with paper based systems that are in use today. No additional programs or computers are required to make use of this compliance system!

¹ Verigo Wireless Logbook and Trip Inspection software will operate on Pocket PC cell phones or Pocket PCs using the Windows Mobility or Windows CE operating system. The device must have a touch screen with 240 x 320 resolution. Compatible devices include Pocket PC cell phones and Pocket PCs from: Dell, HP, Symbol, Intermec and others. Download and test a trial version of the software from our web site.

Hardware and Pricing

- Users will be required to have a UTSarcom 6700 Pocket PC cell phone or similar device to operate the Verigo Wireless logbook software.
- Drivers may purchase the phone themselves or the phone may be supplied by the trucking company.
- The phones are available from most cell phone retailers. Currently these phones are very attractively priced for **as low as \$99.99²**.

Rule	Used	Avail.
Cycle	41.5	28.5
Driving	5.25	7.75
OnDuty	7.25	6.75
OffDuty	7.5	6.75
16Hour	8	8
70Hour	7.25	62.75

Software and Pricing

- The Verigo logbook and trip inspection program may be downloaded from our web site **starting from \$79**.
www.verigo.ca
- In addition to the software, a renewable subscription must be purchased by the trucking company or the individual driver.
- The subscription allows log sheets and inspection reports to be e-mailed to the office on a regular basis **for as little as \$8.33 per month**.

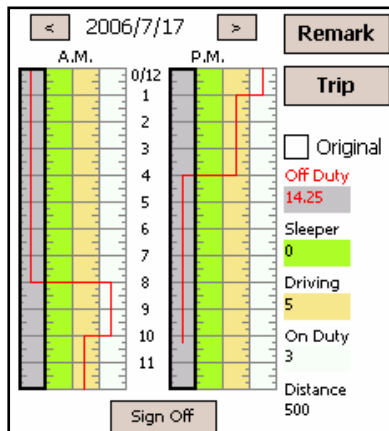

² TELUS new account activation, \$45 voice and data plan required, three year contract, does not include access fees or taxes. Rate may vary by region.

The Wireless Log Book Process

A driver records a change of duty status on his Pocket PC cell phone using the Verigo logbook and vehicle inspection software.

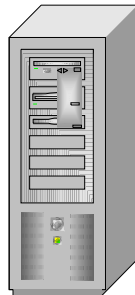

The Verigo logbook tracks the amount of time in each duty status and calculates hours available according to the rules. The information is displayed on-screen for driver review or roadside inspection.

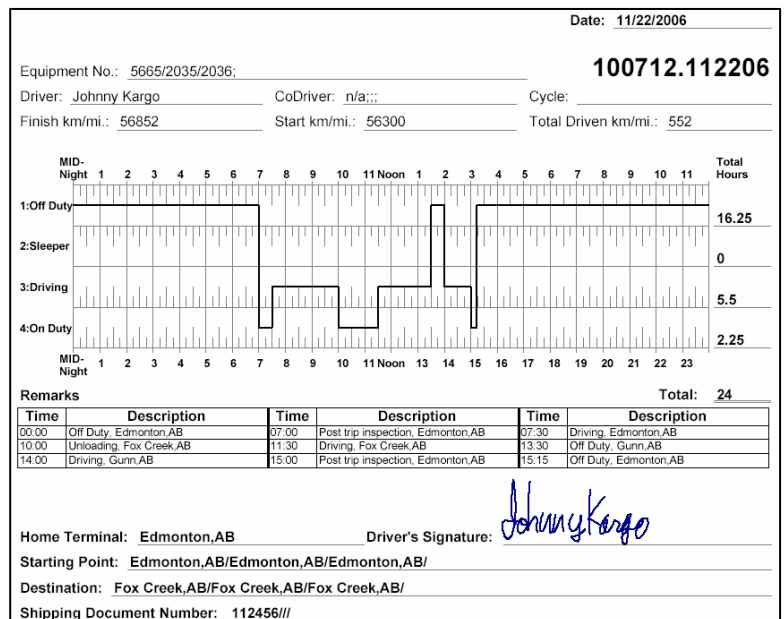

The driver sends the hours of service and vehicle inspection details to the Verigo server via the cell phone.

Paper format log sheets and inspection reports are e-mailed from the server to addresses entered by the driver. Log sheets may be sent to employers or road side inspectors.

Server

Employers may also subscribe to:

- **Free** access to view the logbook recap
- on-line driver logbook auditing service
- on-line driver productivity reports
- data import for carrier audit program

Wireless Inspection Report

Inspection report screen

- Verigo Incorporated has integrated the National Safety Code Daily Vehicle Trip Inspection Reports into its innovative and driver friendly wireless logbook program.
- When a driver logs on-duty and selects the Trip Inspection remark, a vehicle defect report is opened.
- The driver taps the screen to mark a defective item and may add written comments to describe the location of the defect or other details.
- The trip inspection report can be sent to the trucking company or viewed on the display screen for roadside inspection.
- User may customize the report by adding other inspection items and out-of-service conditions.
